
Textile waste
Textile waste places a heavy burden on the
environment. Over 92 million tonns of clothing
are discarded every year resulting in trash,
microplastic and around 10
CO_2 emissions.
Solutions:
1 buy used clothes
2 wear the clothes as long
as possible
3 don't follow every trend
Who pro

PLASTIC
1) What is this type of pollution?
Plastic pollution is made from
synthetic polymers derived from
fossil fuels.
3) Who profits from it?
- the people who profits from it are Petrochemicals,
and chemical giants, consume goods companies
and Waste Managment and Recycling Companies
they profit from them because plastic is a
cheap and durable Material.
1) What is this type of pollution?
A) Air pollution
B) Water pollution
C) Soil pollution
D) Noise pollution
3) Which Companies profit from plastic waste?
WASTE
2) Why does it exist??
- Plastic waste exist because plastic is cheap, durable and
It's wasteful because it last centuries but we throw it away
after one use, so it piles up.
2) How does it harm our planet?
- It's harmful because million of animals die From it,
and microplastics get in our food and it harms our
ocean.
2) How much Plastic is Produced world wide every year?
A) 80 million metric Tons
B) 250 million metric Tons
C) 400 million metric Tons
D) 800 million metric Tons
4) What is the single greatest threat to biodiversity on E

Electronic
We should reduce the amount of
electronic waste by buying and
manufacturing fewer things.
